

Don't let thieves

jeopardize your water sport season!

LES VERROUS
AMPLOCK

THE ULTIMATE ANTI-THEFT LOCK

This system was specifically designed for drawn vehicles. Basically, it is a lock which is installed onto the vehicle or directly onto the trailer when it is unhitched. The lock is made of ductile iron, which renders it 40 times more resistant to destruction than any other product on the market. The Achilles' heel of most locks is their locking mechanism. AMPLOCK uses a disk-locking mechanism, which is both difficult to pick or drill, and which cannot be frozen using liquid Nitrogen.

The Aviva Kit consists of:

One BR Lock

Two AMPBolts

Trailer Coupler with
Protective Devices

BR Model prices vary from \$270 to \$357 in accordance with models. AMPBolts are \$50 for both included installations. Prices are subject to change without advance notice.

An Exclusive Offer from Your Insurer

The NAUTIMAX Program

A 20 % Annual Premium Rebate Applied to Your Aviva Elite Insurance Policy.

Aviva Elite acknowledges AMPLOCK Anti-theft Locking Devices to be an excellent way to prevent the theft of your equipment.

For additional information, please contact your property insurance agent.

**The 20% discount only applies to trailer-borne craft.*
